Marlene H. Dortch, Secretary  
Federal Communications Commission  
445 12<sup>th</sup> Street SW  
Washington, DC 20554

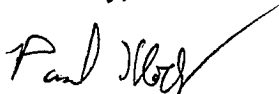

Dear Ms. Dortch:

I am a registered Land Surveyor in the State of Indiana. As a Land Surveyor, I routinely use high precision GPS equipment in many aspects of my profession. It is extremely critical that I continue to receive reliable GPS signals in order to perform my work. The public will be significantly harmed if current GPS signals are rendered useless for high precision applications. Thousands of people rely upon the work that Land Surveyors perform from real estate transactions to the building of roads, bridges, and buildings, to name a few.

It is my professional opinion that LightSquared should not be allowed to go forward until they have shown that their plan will not interfere with high precision GPS. It is my understanding that there are recent independent test results that have been ignored by LightSquared that need to be examined and addressed.

In short, I **oppose** LightSquared's request to affirm its license and its request to go forward with its plan.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul Klodzen", with a long, sweeping horizontal stroke extending to the right.

Paul Klodzen, RLS
